There is no story, no goals... just get to the next level... it gets boring after a while.. This is my first review and I have played quite a few games on the Vive. I really like this game! I am not very far in but the gun mechanics and tank movement is very smooth. I can tell it will be a game I keep coming back to play. It feels like this game was made for the Vive! :). enjoyed how the game was split up into two parts (adolescence and adulthood) that was a good touch.

I only wish there were more male partner options; there are only 3. However each one has 4 possible endings, so I suppose it almost makes up for it :). First person pac-man puzzle game

Really cool Dark Souls style world design

Metroidvania style upgrades

The puzzles are nothing special but are fun enough to keep you going

Story is okay

A slow game that's not for everyone, but I like it and you might too. Click the LMB until you reach the "congratulations - you win!!" screen.. not exactly an absorbing experience.. This game is like a ancient version of Sims City. Although it is old I believe it still stands up to being a great game!. PopCap and Square Enix made a game. It's a JRPG where the battles are decided with monsters (which you collect, like Pokémon) that play Bejeweled Twist. Also, kickass soundtrack.

---

Nice job! This is the best VR shooter I've tried before!

So intense and the graphics is amazing.

3rd level was too hard, but maybe it's just me.

Worth a price.

Definitely keeping it and looking forward for the next update. \u044f \u043d\u0435\u043d\u0430\u0430\u0432\u0438\u0436\u0443 \u0441\u0441\u0432\u043e\u0442 \u0438 \u0436\u0438\u0437\u043d\u044c.. It's a useful rune, but just consider, are you willing to spend a euro to do a bit of extra damage in a game? seems like a waste of money to me. ENG:

Hauska!?! Ehdottomasti! Joten, KYLLÄ!

IGN 10/10!

Paras ikinä pelaamani kolmannen persoonan kulmasta pelattava ei f2p -moba peli!. This game feels like nothing more than rapid-fire clicking to grow predetermined plants. There seems to be little agency involved for the player.. very nice and funny game. Although I loved the original King Arthur series, I kinda skipped this game based on the feedback I read about how slow the game ran even if your system meets or exceeds the recommended specs.

Fast forward to today, I got this on sale at BundleStars.

And I witnessed first hand how choppy the game was!

My system is capable of running Rome2 with all the sliders maxed out. And yes, it can also play Crysis. :)

But it was very laggy on this game.

But despite that, I still like the game. The graphics are gorgeous. The gameplay...same as the original King Arthur.

Unfortunately, I'll probably shelf this game until I can upgrade to a more powerful system.

I recommend this game if you liked the first King Arthur series, and if you have a system powerful enough...maybe the top tier h/w for 2015?. Lack of agency and no presence make this a pretty big miss for me. Not in step with where VR design has progressed to, and a bit nausea inducing as a result. Love the initial world building though - would love to see a version with movement rather than being a fairly polished wave-clearing experience.. pains me to give a negative review on an idea factory/compile heart game however at this moment the dlc is not working and hopefully they fix it soon. until then i dont recommend buying the dlc until they have released a fix

-----  
\*UPDATE\*

the dlc now works for me and i 100% recommend buying this dlc!!!. It is one hell of a lot of fun; it involves a bit of teamwork, navigating the ships so as to allow the crew to fire upon the enemy, but there is a gleeful sense of insanity to the proceedings :)
