I bought this game for a joke because it is a trash game and I knew it. I thought there would at least be 1 player maybe playing so I could actually start a game. But I wasted time I will never get back waiting for players. You're making us pay \u00a37 for 0 players, you also dropped the game I believe because you have not updated since ages. Terrible game. Don't waste your money, good thing I refunded.

The Early Access ends today. I consider that this game offers almost everything a complete game has to offer.

Aurora Dusk is still imperfect. There are still bugs and other problems in the game. The end of the Early Access does not mean the end of the game development. It will get other updates in the future.

The Early Access lasted almost 3 years. During this period, the game was updated with many major additions:

V1.3.0.1 (28 July)

- can select starting point on the map in skirmish mode.

- bugs corrected when you use companions (characteritic restoration and equipment shortcuts)

- bug corrected when you command soldiers/golems.. **No update in December**:

I have not finished the next update : "custom AI".

With the approach of Christmas, I lack of time and I will not publish an unfinished update that could bring new bugs.

Sorry and thank you for your understanding. I'm working alone on Aurora Dusk.

Happy holidays to you and your families!. **v1.4.1 - online multiplayer (beta)**:
